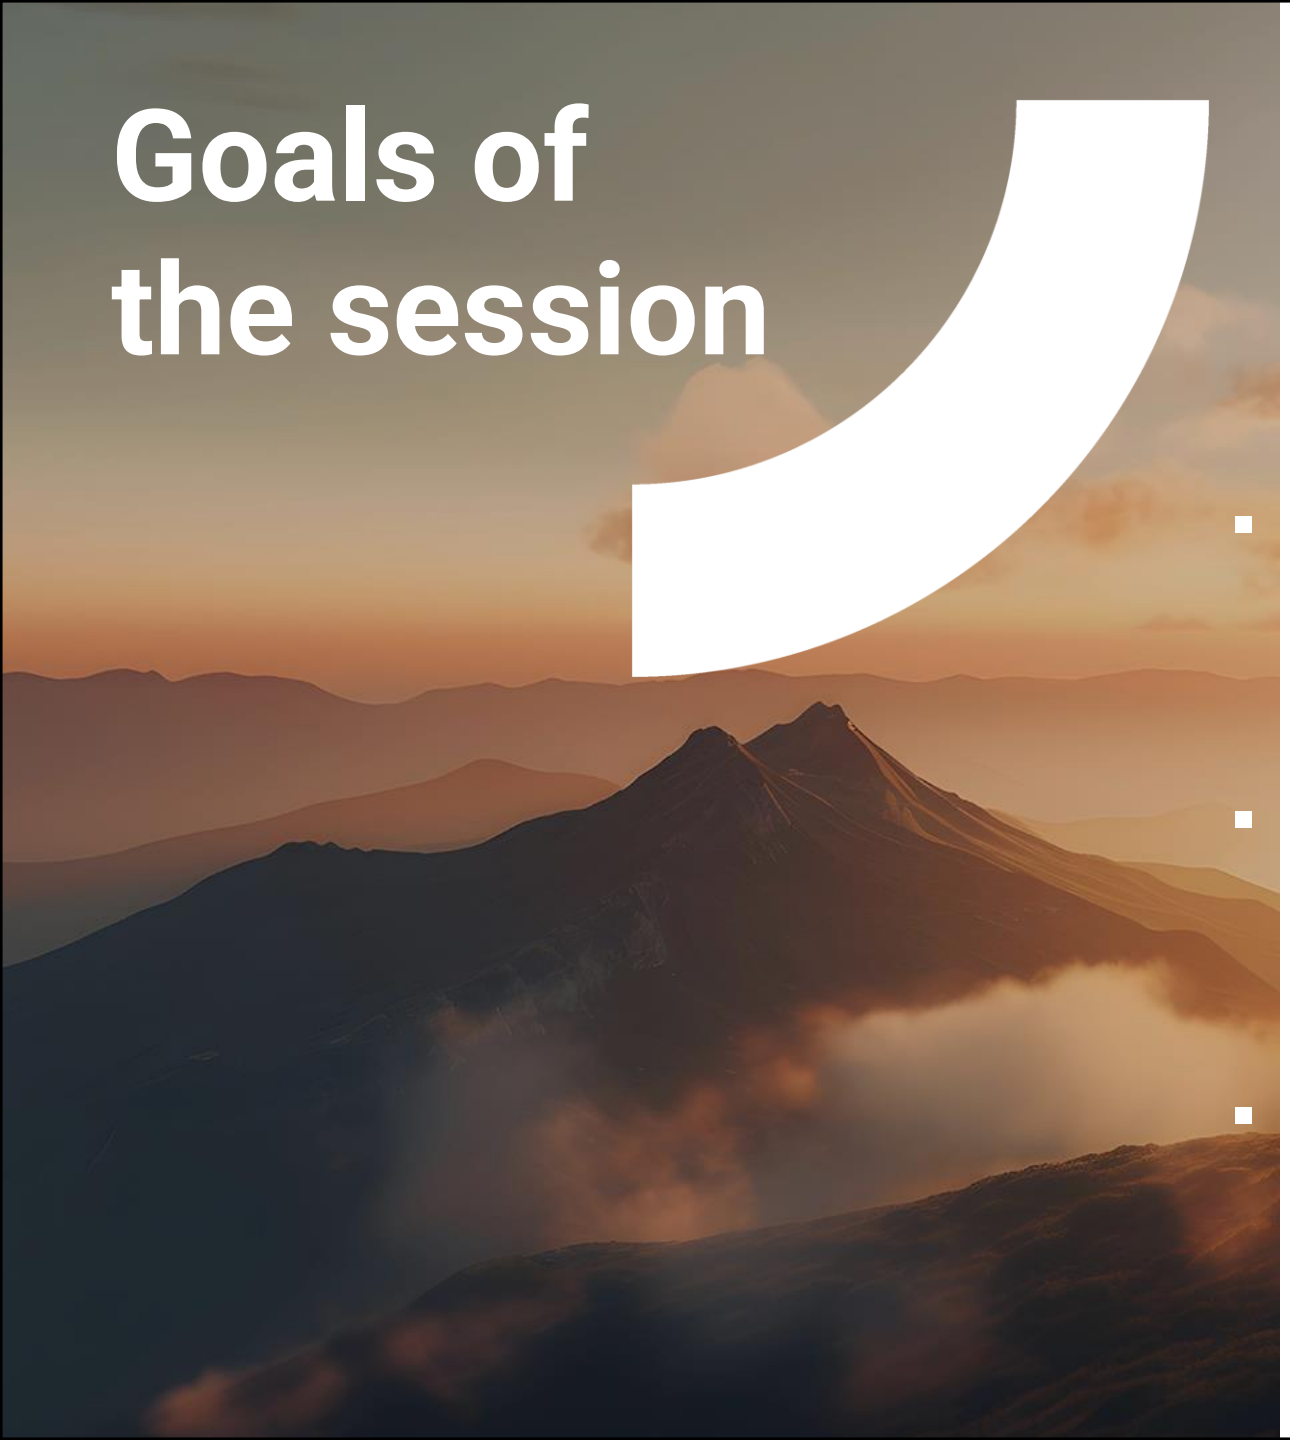
6th EELISA Joint Call – Information session

23 September 2025 – 14:00-15:00 CET
(online)



Goals of the session

EELISA European University

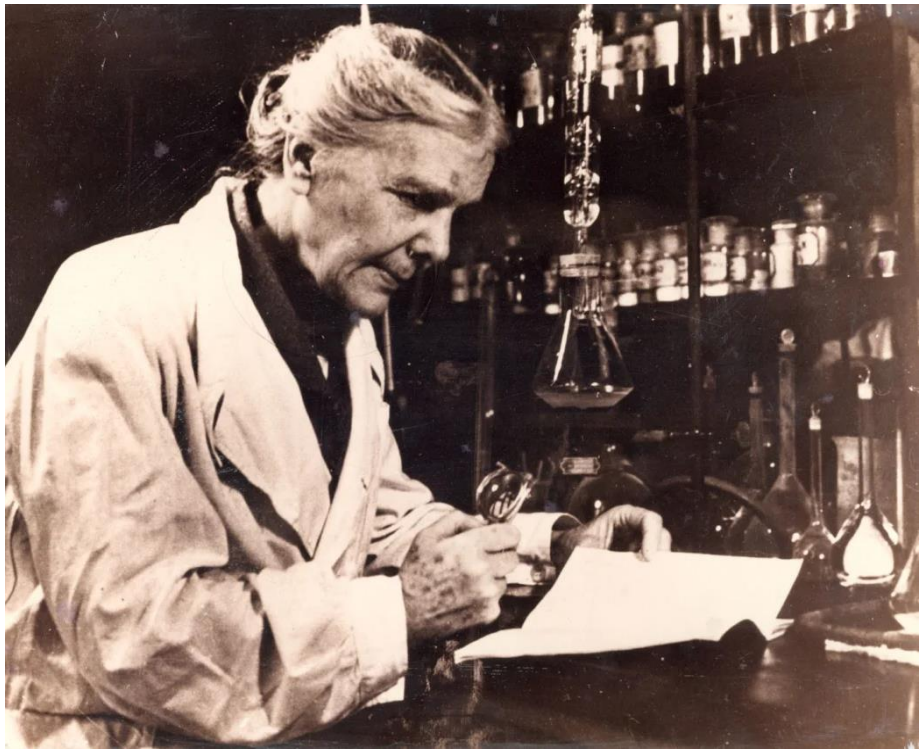
Co-funded by the European Union

- Provide information on the 6th EELISA Joint Call / 01
- Address questions from potential participants / 02
- Gather feedback / 03

European Engineering Learning Innovation and Science Alliance (EELISA)

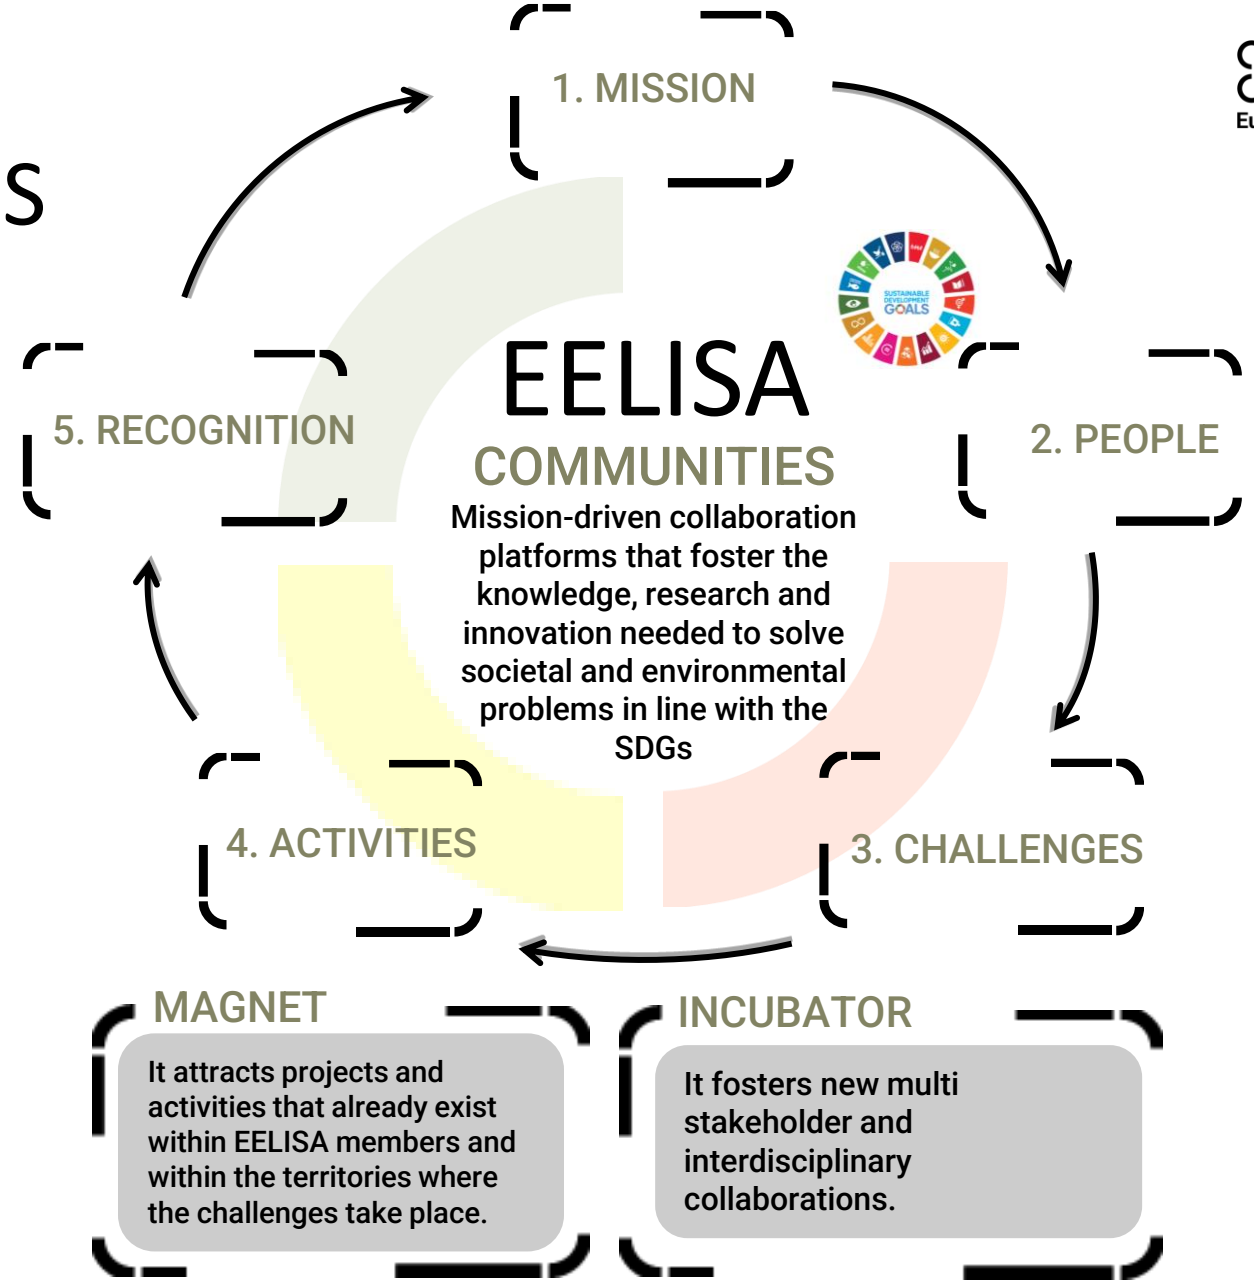
Co-funded by the European Union

brings together **10 institutions** from **8 countries** in Europe with the goal of making European higher education a driving force for an **equitable green and digital transition**.



EELISA's acronym pays tribute to women engineers through the memory of **Elisa Leonida Zamfirescu** (1887-1973), one of the first women to obtain an engineering degree in the world. She also embodied the values of **multiculturalism**, **inclusiveness**, **innovation**, **excellence**, and **social commitment** that EELISA holds today.

EELISA COMMUNITIES



THE LIVING ECOSYSTEM OF EELISA COMMUNITIES

Problem owners, stakeholders, professionals and entire universities come together in EELISA communities providing interdisciplinary solutions to societal challenges

Basic philosophy

1.1. Context: EELISA Communities and economic support

Joint Calls are a way of providing competitive financial support to EELISA Communities through EELISA activities that lead to EELISA Credentials. The specific characteristics of EELISA Communities can be found on the EELISA website (https://eelisa.eu), but in the wider context of higher education institutions, they can be compared to Interdisciplinary Organizations or IDOs (*sensu* Yang et al., 2020[1]), cross-disciplinary and multi-actor academic research teams addressing complex challenges in conjunction with the Triple Helix (industry, government, and civil society). EELISA Communities, however, can be regarded as a novel concept being less related directly to research, and more to innovative teaching methods, linking research, innovation and challenge-based learning. Joint Calls have been used to promote this linkage, emphasising the important role of education and training.

RATIONALE & SCOPE

- Promote inter-institutional activities within EELISA Communities to advance innovative teaching methods addressing SDGs.
- Special emphasis on research and innovation

DESCRIPTION

Activities should be:

- interdisciplinary, mission-driven, and involve stakeholders from at least three EELISA partners.
- Open to all EELISA students

Evaluation criteria

EELISA European University

Co-funded by the European Union

- 01 **Activity Description:** Innovative teaching methods (e.g., PBL, RBL, SL, CBL), participation balance, and issuance of EELISA credentials (max 50 points).
- **02 Excellence and Impact:** Relevance, novelty, and societal impact (max 30 points).
- **03 Implementation:** Execution plan, sustainability, and budget (max 20 points).
